

HYGIENIC SOLUTION

Antibac Treatment

Textile ducts are suitable for a wide range of industries, including food industries. This is because they are hygienic, easy to maintain and have a high capacity to capture dust, which significantly extends the intervals between washing and maintenance.

Antibac-E

For applications in humid environments, such as slaughterhouses, dairies or refrigerated warehouses with a higher chance of growth of unwanted microorganisms. This unwanted contamination can be prevented by treatment with Antibac-E.

Antibac-E offers a complete hygienic solution for the entire system that will prevent the unwanted growth of microorganisms for up to 3 washing cycles. Antibac-E is approved in accordance with the standards EN ISO 20645:2004 and EN ISO 20743:2013 and, because it does not contain silver ions or any other hazardous chemicals, it is completely environmentally friendly.
